

PSM Leader

Anderson Development Company is seeking a PSM Leader for our Adrian, Michigan facility

We have been a frontrunner in Chemistry for over 50 years making products you use better. It might be to keep the car you used to visit your family looking shiny in a planet-friendly way, enabling the cell phone you use to keep in touch with your friends, the DIY products that keep your house looking great longer, or that packaging that kept your food fresh.

Our technologists develop materials and applications to make those products more friendly for the planet, tougher and longer lasting, or allow their production in a manner that is safer and more environmentally friendly. From our headquarters and laboratories in Michigan, we partner with customers all over the world to help make their products better and to make their businesses safe, sound, and competitive.

The key to our success has always been our people, who strive to exceed our customer's expectations. We are looking for you, your talents, and your creativity to help us to continue our success.

The PSM Leader is responsible for managing all aspects of Anderson Development Company's PSM compliance systems. The PSM Leader will drive improvements in Process Safety Management performance by influencing, facilitating, providing guidance, mentorship and leadership to move the organization to the next level of process safety performance.

Required Qualifications and Skills

- Bachelor's Degree in science or technical field. Alternatively, B.S. or B.A. in unrelated field and a minimum of 3 years direct experience managing and maintaining PSM compliance systems in including Mechanical Integrity management systems
- Minimum 2 years developing and maintain PSM compliance systems
- Detailed understanding of 29 CFR 1910.119 – OSHA Process Safety Management of Highly Hazardous Chemicals
- Detailed understanding of API 510, API 570, API 653, and STI inspection standards
- Experience using MS Office - Word, Excel, and PowerPoint

Preferred Qualifications and Skills

- Bachelor of Science in Mechanical Engineering
- Certified PHA Leader
- Experience using and configuring mechanical integrity management software to track inspection schedules, manage report findings, manage inspection recommendation findings
- Experience using and configuring Process Hazard Analysis management software to document PHAs and what-if studies
- Basic understanding of the chemical process unit operations and typical damage mechanisms associated with them
- Ability to develop and deliver training covering all aspects of the PSM standard
- Ability to network with other PSM system managers / coordinators to benchmark ADC's compliance systems against industry standards to generate and implement improvements

Apply Now! We Look Forward To Hearing From You!
